

# Bream

The **Bream** diet program is designed to provide an optimal formulation for the level of intensity of your cultivation.

Sea bream farming is becoming increasingly popular because of the high value of meat. Sea bream is one of the most highly valued fish for its sweet taste, moist but firm texture, and pinkish-white coloration of the flesh.

Today, over 100,000 tons are produced worldwide do it annually. Agrinatura offers a complete choice of food for Sea bream, from Fry, feed to Broodstock. Food is available for cultivation in three levels of nutrients ingredients, Orada 48/15, Orada43 / 17, Orada 44/18, Sea bream 42/19, Sea bream 54/20, to best fit the super-intensive RAS system (breeding recirculation system) of lower intensity ponds.

All our food contains the highest quality raw materials high digestibility, the highest quality proteins with a high biological value that encourages healthy growth and development of gilthead seabream.

Juvenile

Grower

# Bream

STAGE	NAME	Protein (Min%)	Fat	Fibers (Max%)	Moisture (Max%)	Ash (Max%)	Phosphorus (Max%)	Floating	Slow sinking	Sinking	Size mm	DESCRIPTION
Juvenile	Orada 48/15	48	15	1,9	10	7,2	1,8			●	2	Improved high-protein foods with special formulas
Grower	Orada 43/17	47	17	4,5	10	6,5	1			●	3	A complete food, a very effective fishmeal-based diet designed to feed a variety of fresh and carnivorous fish with moderate protein needs. Designed for RAS system (recirculation systems)
	Orada 44/18	44	18	4,5	10	6,5	1			●	4.5	Food-based on plant and animal proteins is highly efficient, specially formulated for gilthead seabream grown in intensive recirculation systems. It has a uniform amino acid formulation and is highly digestible, resulting in low pollution. Designed for RAS systems (recirculation systems).
	Orada 42/19	42	19	4,5	10	6,5	1			●	6	Designed for ponds and cage systems
	Orada 54/20	54	20	4,5	10	6,5	1			●	11	Especially high-quality high protein and energy foods for outstanding results

## SUSTAINABLE AND TRACEABLE

- Use of renewable vegetable proteins and oils
- Inclusion of fish by-products from human food processing
- Fish meal and fish oil substitutes
- The use of natural, bioactive compounds to improve animal health and further reduce the need for farms to use chemicals and antibiotics
- Maximize the use of locally available ingredients

## PACKING

### Bags

For specific pellet sizes and packaging information, please contact Agrinatura doo.

## FEATURES AND ADVANTAGES

- Formulated to maximize growth and reduce visceral fat deposition in species that do not use fats to save protein.
- Selection of ingredients based on testing the digestibility of real fish. Balanced amino acid profile.
- Selection of ingredients based on testing the digestibility of real fish. Balanced amino acid profile.
- Meets FDA requirements regarding restrictions on mammalian protein sources.

## INGREDIENTS

A strict raw material procurement program keeps our suppliers on higher standards with pre-established specifications, site visits, and ingredient testing. This careful monitoring, record keeping, and quality control continue through the supply chain. Agrinatura products satisfy the range standards and are produced in a plant that uses: a quality management system registered ISO 9001: 2008. Except moreover, Agrinatura meets the requirements it has set the US Food and Drug Administration (FDA), USA.

## PRODUCT STORAGE INSTRUCTIONS

- Store in a cool, dry place away from sunlight
- Check the packaging on the dates produced
- Rotate the stock to use the oldest product first ("first in, first out" principle)
- Remove the plastic wrap to extend the life of the product
