

Crabs

The **Crabs** diet program is designed on how would allow for optimal formulation for the level of intensity of your cultivation.

Scientifically formulated, complete and balanced nutrition. Ensured fast growth and optimal conversion ratio of shrimp food. Top-quality with high stability. No banned chemicals and antibiotics.

Juvenile to Finisher. Food is available for cultivation in several levels of nutrients starter 40/5; 38/5, grower 36/5; finisher 36/5, how would fit the super-intensive RAS best fish farming system (recirculation system) of lower intensity. Our food contains the highest quality raw materials with high digestibility, the highest quality proteins with a high biological value that encourage healthy shrimp growth and development.

Starter

Grower

Finisher

Crabs

STADIJ	NAZIV	Protein (Min%)	Fat	Fibers (Max%)	Moisture (Max%)	Ash (Max%)	Phosphorus (Max%)	Floating	Slow sinking	Sinking	Size mm	OPIS
Starter	Shrimp 40/5	40	5	2	11	9	1,8		●		1	Improved high-energy food with a special formula for the transition from Starter to Juvenile
	Shrimp 38/5	38	5	2	11	9	1,4	●			2	Food with increased energy that is designed to facilitate the transition from Juvenile to Grower
Grower	Shrimp 36/5	36	5	2	11	9	1	●			2,2/2,3	A complete food, a very effective fishmeal-based diet designed to feed a variety of omnivorous and carnivorous fish with moderate protein needs. Designed for RAS systems (recirculation systems) • Foods based on high-efficiency plant proteins, specially formulated for crabs grown in intensive recirculation systems. It has a uniform formulation of amino acids and is highly digestible, resulting in low pollution. Designed for RAS systems (recirculation systems).
Finisher	Shrimp 36/5	36	6	3,5	11	9	1	●			2,5/3,0	Designed for ponds and cage systems

SUSTAINABLE AND TRACEABLE

- Use of renewable vegetable proteins and oils
- Inclusion of fish by-products from human food processing
- Fish meal and fish oil substitutes
- The use of natural, bioactive compounds to improve animal health and further reduce the need for farms to use chemicals and antibiotics
- Maximize the use of locally available ingredients

PACKING

Bags

For specific pellet sizes and packaging information, please contact Agrinatura doo.

FEATURES AND ADVANTAGES

- Formulated to maximize growth and reduce visceral fat deposition in species that do not use fats to save protein.
- Selection of ingredients based on testing the digestibility of real fish.
- Balanced amino acid profile.
- Phosphorus levels below 1.2%.
- Meets FDA requirements regarding restrictions on mammalian protein sources.

INGREDIENTS

A strict raw material procurement program keeps our suppliers on higher standards with pre-established specifications, site visits, and ingredient testing. This careful monitoring, record keeping, and quality control continue through the supply chain. Agrinatura products satisfy the range standards and are produced in a plant that uses: a quality management system registered ISO 9001: 2008. Except moreover, Agrinatura meets the requirements it has set the US Food and Drug Administration (FDA), USA.

PRODUCT STORAGE INSTRUCTIONS

- Store in a cool, dry place away from sunlight
- Check the packaging on the dates produced
- Rotate the stock to use the oldest product first ("first in, first out")
- Remove the plastic wrap to extend the life of the product
