

# Barramundi

The diet program for **Barramundi** is designed to provide the optimal formulation for the level of intensity of your cultivation.

Barramundi is grown in ponds, cages, and tanks. Experience shows that the inclusion of a diet high in digestible proteins and fats in the diet leads to rapid growth and very low FRC (<1.0) and these fish with a size of 600-900 grams are ready for market within 8 months.

Agrinatura offers a complete selection of food for Barramundi from Fry feeds to Grower. The food is available for breeding in 2 levels of nutrients, Barramundi 54/20, Barramundi 54/18 to best fit the super-intensive RAS system (recirculation breeding system) of lower intensity ponds.

All our food contains the highest quality raw materials with high digestibility, the highest quality proteins with a high biological value that promote healthy growth and development.

# Barramundi

STAGE	NAME	Protein (Min%)	Fat	Fibers (Max%)	Moisture (Max%)	Ash (Max%)	Phosphorus (Max%)	Floating	Slow sinking	Sinking	Size mm	DESCRIPTION
Juvenile	Barramundi 54/20	54	20	1	10	8,9	1,8	●			2	Improved high-energy food with a special formula.
	Barramundi 54/20	54	20	1	10	8,9	1	●			3; 4,5; 6	A complete food, a very effective fishmeal-based diet designed to feed a variety of omnivorous and carnivorous fish with moderate protein needs.
Grower	Barramundi 56/18	56	18	0,9	10	9,5	1	●			9;10;11	Specially formulated foods based on high amounts of highly digestible proteins and fats lead to rapid growth and very low FRC (> 1.0). The highest food intake is obtained when the food is semi-floating or slow-sinking. It has a uniform amino acid formulation and is highly digestible, resulting in low pollution.

## SUSTAINABLE AND TRACEABLE

- Use of renewable vegetable proteins and oils
- Inclusion of fish by-products from human food processing
- Fish meal and fish oil substitutes
- The use of natural, bioactive compounds to improve animal health and further reduce the need for farms to use chemicals and antibiotics
- Maximize the use of locally available ingredients

## PACKING

### Bags

For specific pellet sizes and packaging information, please contact Agrinatura doo.

## FEATURES AND ADVANTAGES

- Formulated to maximize growth and reduce visceral fat deposition in non-fat species to save protein.
- Selection of ingredients based on testing the digestibility of real fish.
- Balanced amino acid profile.
- Phosphorus levels below 1.2%.
- Meets FDA requirements regarding restrictions on mammalian protein sources.

## INGREDIENTS

A strict raw material procurement program keeps our suppliers on higher standards with pre-established specifications, site visits, and ingredient testing. This careful supervision, proof, and quality control continue through the supply chain. Agrinatura products satisfy the range standards and products used in the plant used: quality management system registered ISO 9001: 2008. Except moreover, Agrinatura meets the requirements it has set US Food and Drug Administration (FDA), USA.

## PRODUCT STORAGE INSTRUCTIONS

- Store in a cool, dry place away from sunlight
- Check the packaging on the dates produced
- Rotate the stock to use the oldest product first (“first in, first out” principle)
- Remove the plastic wrap to extend the life of the product
