

# Sea Bass

Juvenile

Grower

The diet program for **Sea bass** is designed on how would allow for optimal formulation for the level of intensity of your cultivation.

Many say that sea bass is the most intelligent fish in the sea loves to explore and remembers events from the past. But what costs him his head the most is his courage and fearlessness because above all there is little in its natural setting which can hurt him. It should be emphasized that it is sea bass a great marine predator, the greatest fear and trembling of the shallows the terrain in which it inhabits. Although there are no code rules his choice of terrain seems to be more preferred sandy, scaly and grassy bottom, and more turbid the sea.

Agrinatura offers a complete selection of food for Sea bass, from Fry feed to Grower. Food is available for cultivation in three levels of nutrients, Sea bass 48/15, Brancin 41/19, and Brancin 40/20, to best fit the super-intensive RAS system (breeding recirculation system) of lower intensity ponds.

All our food contains the highest quality raw materials high digestibility, the highest quality proteins with a high biological value that encourages healthy growth and development.

# Sea Bass

STAGE	NAME	Protein (Min%)	Fat	Fibers (Max%)	Moisture (Max%)	Ash (Max%)	Phosphorus (Max%)	Floating	Slow sinking	Sinking	Size mm	DESCRIPTION
Juvenile	Sea Bass 48/15	48	15	2,5	10	7,5	1,8			●	2	Improved high-energy food with a special formula
Grower	Sea Bass 46/16	46	16	2,5	10	8,9	1			●	3	A complete food, a very effective fishmeal-based diet designed to feed a variety of omnivorous and carnivorous fish with moderate protein needs. Designed for RAS systems (recirculation systems)
	Sea Bass 41/19	36	6	2,5	10	8,9	1			●	4.5	Foods based on high-efficiency plant and animal proteins, specially formulated for tilapia are grown in intensive recirculation systems. It has a uniform amino acid formulation and is highly digestible, resulting in low pollution. Designed for RAS systems (recirculation systems).
	Sea Bass 40/20	32	3	2,5	10	8,9	1			●	6	Designed for ponds and cage systems.

## SUSTAINABLE AND TRACEABLE

- Use of renewable vegetable proteins and oils
- Inclusion of fish by-products from human food processing
- Fish meal and fish oil substitutes
- The use of natural, bioactive compounds to improve animal health and further reduce the need to grow chemicals and antibiotics
- Maximize the use of locally available ingredients

## PACKING

### Bags

For specific pellet sizes and packaging information, please contact Agrinatura doo.

## FEATURES AND ADVANTAGES

- Formulated to maximize growth and reduce visceral fat deposition in species that do not use fats to introduce protein.
- Selection of ingredients based on testing the digestibility of real fish.
- Balanced amino acid profile.
- Phosphorus levels below 1.2%.
- Meets FDA requirements regarding restrictions on mammalian protein sources.

## INGREDIENTS

A strict raw material procurement program keeps our suppliers on higher standards with pre-established specifications, site visits, and ingredient testing. This careful supervision, proof, and quality control continue through the supply chain. Agrinatura products satisfy the range standards and products used in the plant used: quality management system registered ISO 9001: 2008. Except moreover, Agrinatura meets the requirements it has set US Food and Drug Administration (FDA), USA.

## PRODUCT STORAGE INSTRUCTIONS

- Store in a cool, dry place away from sunlight
- Check the packaging on the dates produced
- Rotate the stock to use the oldest product first ("first in, first out" principle)
- Remove the plastic wrap to extend the life of the product
