

Trout

The Trout diet program is designed to provide the optimal formulation for the level of intensity of your farming.

Trout farming is becoming increasingly popular due to the high value of the meat and the favorable price. Trout is one of the most important and highly appreciated fish of fine taste, moist but firm texture and white coloration of the meat.

Agrinatura offers a complete selection of trout food from Juvenile to Broodstock. The food is available for farming in three levels of nutrients: Juvenile, Grower, Broodstock; Trout 48/17, Trout 44/24, Trout 44/23, Trout 43/23, Trout 43/22, in order to best fit the super intensive RAS system (breeding recirculation system) of lower intensity ponds.

All our food contains the highest quality raw materials with high digestibility, the highest quality proteins with high biological value that promote healthy growth and development of sea bream.

Juvenile

Grower

Broodstock

Trout

STAGE	NAME											DESCRIPTION	
		Protein (Min%)	Fat	Fibers (Max%)	Moisture (Max%)	Ash (Max%)	Phosphorus (Max%)	Floating	Slow sinking	Sinking	Size mm		
Juvenile	Pastrmka 48/17	48	17	1,5	10	7	1,4	●	●	●	1,7,2	Improved high-protein foods with a special formula	
	Grower	Pastrmka 44/24	44	24	1,5	10	6,5	1,3	●	●	●	3,4,3,3,4,4	Complete food, a very efficient fishmeal-based diet, designed to feed a variety of omnivorous and carnivorous fish with moderate protein needs. Designed for RAS systems (recirculation systems).
		Pastrmka 44/23	44	23	1,5	10	6,5	1,3	●	●	●	6	Hrana na bazi animalnih proteina visoke učinkovitosti, posebno formulirana za uzgoj pastrmke. Ima ujednačenu formulaciju aminokiselina i vrlo je probavljiva, što rezultira niskim zagađenjem. Dizajnirana za RAS sisteme (recirkulacione sisteme).
		Pastrmka 43/23	43	23	1,5	10	6,5	1,3	●	●	●	6, 9	Foods based on high-performance animal proteins, specially formulated for trout farming. It has an even amino acid formulation and is highly digestible, resulting in low pollution. Designed for RAS systems (recirculation systems).
Broodstock	Pastrmka 42/22	42	22	1,5	10	6,5	1,3	●	●	●	11	Designed for ponds and cage systems.	
	Pastrmka 48/15	48	15	1,5	10	7	1,4	●	●	●	9	Especially high-quality high protein and energy foods for outstanding results.	

SUSTAINABLE AND TRACEABLE

- Use of renewable vegetable proteins and oils
- Inclusion of fish by-products from human food processing
- Fish flour and fish oil substitutes
- The use of natural, bioactive compounds to improve animal health and further reduce the need for farms to use chemicals and antibiotics
- Maximize the use of locally available ingredients

PACKING

Vreće, big beg

Za određene veličine peleta i podatke o pakiranju obratite se Agrinatura doo.

FEATURES AND ADVANTAGES

- Formulated to maximize growth and reduce visceral fat deposition in species that do not use fats to save protein.
- Selection of ingredients based on testing the digestibility of real fish.
- Balanced amino acid profile.
- Phosphorus level below 1.2%
- Complies with FDA requirements regarding restrictions on mammalian protein sources.

INGREDIENTS

A strict raw material procurement program keeps our suppliers on higher standards with pre-established specifications, site visits, and ingredient testing. This careful monitoring, record keeping, and quality control continue through the supply chain. Agrinatura products satisfy the range standards and are produced in a plant that uses a quality management system registered ISO 9001: 2008. Except moreover, Agrinatura meets the requirements it has set the US Food and Drug Administration (FDA), USA.

PRODUCT STORAGE INSTRUCTIONS

- Store in a cool, dry place away from sunlight
- Check the packaging on the dates produced
- Rotate the stock to use the oldest product first ("first in, first out" principle)
- Remove the plastic wrap to extend the life of the product
